# AN EFFECTIVE SOLUTION, A SAFE EXPERIENCE

People want to feel safe when enjoying their leisure time. Whether attending a concert, watching a sporting event, enjoying a museum, taking the kids to an amusement park or staying in a hotel, knowing that security is a top priority adds to the overall customer experience.

Smiths Detection offers a portfolio of solutions to protect visitors and help you ensure they can relax and enjoy themselves. Our goal is to promote peace of mind and support the freedom of movement upon which the world depends.

Our products use advanced technology to screen people and their belongings effectively and efficiently to protect against evolving threats from explosives, weapons and narcotics.

We have invested four decades of experience in securing public areas at ports and borders and in airports of every size into developing a range of equipment suitable for the hospitality industry. It can be tailored to the individual requirements of small, medium or large-scale operations.

Safety should not come at the expense of entertainment and enjoyment. Security checkpoints in areas such as entrances, car parks or receptions should not feel like an inconvenience to the visiting public.

The appropriate combination of X-ray scanners; handheld explosives and narcotics detectors; and walk-through metal detectors delivers an effective, layered approach to security.

These solutions are designed to be both reliable, user-friendly and easy for security personnel to operate. They offer longevity, turnkey operation, low maintenance and optimum compatibility with the entire security infrastructure.

## EXHIBITIONS

Large exhibitions are held all around the world and they can demand complex safety and security programmes as the threat of terrorist activity is feared by both organisers and visitors. The Smiths Detection portfolio is equipped to secure any venue of any size.

## CONCERTS

Concert venues and festivals are increasingly beginning to implement security plans to keep music lovers safe. Whether you are a sole operator or enjoy a significant security budget, Smiths Detection's solution based technology can address your security concerns and offer best-in-class performance.

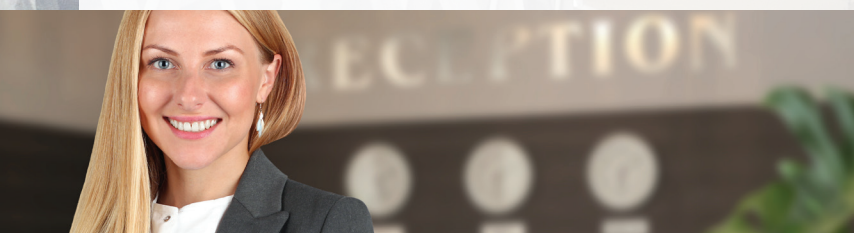

## AMUSEMENT PARKS

Millions of people flock to amusement parks every year and steps can be taken to mitigate terrorist threats without detracting from the fun. Our innovative screening technology can detect the minutest traces of explosives or narcotics.

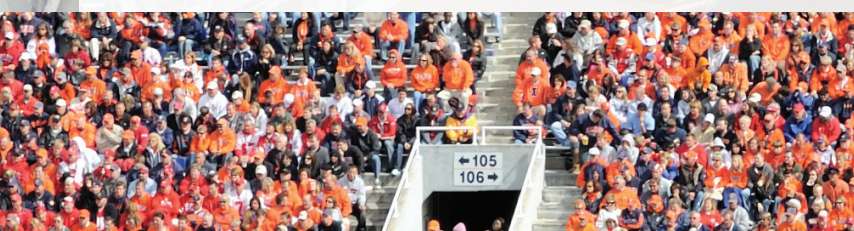

## MUSEUMS

Security challenges for most museums can be complex as they must protect both their collections and visitors from harm – but at the same time, maintain an appropriate ambiance. Smiths Detection offers discreet detection devices and screening equipment with a small footprint.

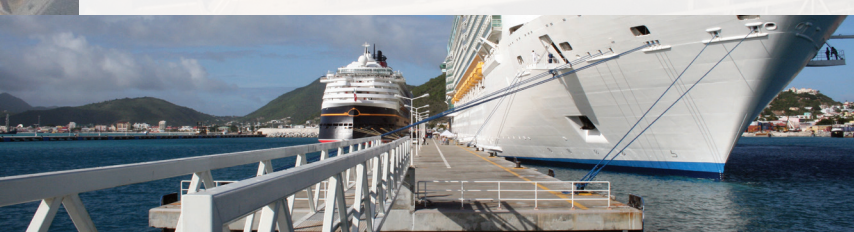

## HOTELS

Integrating a secure checkpoint system into a hotel environment should align with emergency strategies to keep guests safe and offer cost efficiency, whilst also upholding your brand image.

## STADIUMS

Keeping large crowds safe from terrorist threats at stadiums and other sports venues can be facilitated by Smiths Detection's comprehensive service network and powerful solutions. Security personnel will be equipped to handle sudden and unexpected security challenges.

## CRUISE SHIPS

Cruise ship passengers are an increasingly discerning group of people who expect a smooth, fast and secure embarkation. Therefore on-board security provisions are becoming more sophisticated to keep pace with those demands and mitigate the risk of harm to both passengers and the ships.

MAKING THE WORLD A SAFER PLACE

Smiths Detection is one of five operating divisions of Smiths Group, a global technology company listed on the London Stock Exchange. Employing over 23,000 people in more than 50 countries, Smiths Group is a world leader in the practical application of advanced technologies, delivering products and services for threat and contraband detection, medical devices, energy and communications markets worldwide.

Smiths Detection is a global leader in threat detection and screening technologies for aviation, ports and borders, urban security and defence. With more than 40 years of field-tested experience, we deliver the solutions needed to protect society from the threat and illegal passage of explosives, prohibited weapons, contraband, toxic chemicals and narcotics.
